Notes:

- (b) The product covers one piece of garment for the female covering the top of the body and extending from somewhere from the mid-thigh to feet. It is appropriate to wear without other garments and its lower end encloses both the legs in a single " tube" (rather than two, as trousers do).
- (c) In case of blended Textiles, if the fibre content of one type is more than 95%, the DEPB rate of the blended item would be the same as that of the particular fibre. However, if no fibre constitutes 95% or more of the blend, the DEPB rate would be the lowest amongst the different fibres ignoring those with less than 5% in the blend. DEPB rates would not be denied to composite items provided the value of the extra material is upto 5% of the total value and a DEPB rate exists for the fibre comprising a value of 95% or more of the composite.
- (d) In case a value cap has been imposed on a DEPB entry under the Textiles Product Group, the description of the said entry would include those with embroidery and/ or with metallised yarn.
